# ACKNOWLEDGEMENT

---

*I would like to express my special thanks of gratitude to my teacher Mr. Subashis Pattnaik as well as Ms. Anjana Mishra for their invaluable guidance, constant assistance, support endurance and constructive suggestion for the betterment of this project report.*

*Secondly, I would also like to thank my parents and friends who helped me a lot in finalizing this project within the limited time frame.*

## ABSTRACT

*News websites are sites devoted to delivering the news in a different format than television, print or radio. News sites include sites that have a large variety of information which may not be considered "news" by all audiences, but may include entertainment, games, news that may not be current but is interesting, or other miscellaneous information. An example of a site like this is MSN.com.*

*Another type of news site is the site that is completely devoted to news. These sites may include all types of news like political, judicial, entertainment, sports or more. An example of this type of site is CNN.com.*

*Also, there are many news sites devoted to one news or certain activity. For instance, there may be a website completely devoted to one sport or to a certain hobby.*

## INTRODUCTION

*The world is going to be more digital, and digitization is the need of every business, every Industry. Online News Sites play a vital role in educating and informing Mass with latest updates, current happenings around the globe.*

*People don't have much more time to read the Printed newspaper with yesterday's happening, so they always follow web portals or Electronic Media for getting latest News.*

*With Electronic media, there is a certain problem like Costing of On Air is higher, and everyone is not always in front of Television set, but they can access their mobile, social sites, WhatsApp, Facebook etc. so they will defiantly update them self very fast and less time-consuming methods.*

*Online News Website and social media can give the fastest news Updates. Now every publisher must build their web identity.*

## INTERFACE

*The greatest issue with most news websites is that they are bloated with adverts, which makes them quite heavy on the eyes and often difficult to browse.*

*Also, news websites are becoming less popular as people prefer to read their news on social media. This, I believe, is one of the key reasons why there is no true innovation in the UI design of news websites, and everything looks the same.*

*This website features a simple UI that is easy to read, has fantastic pictures, stylish fonts and colours, and adverts that are nearly undetectable. Using HTML, CSS, and JavaScript.*

## FEATURES

- 1. Instant & latest news from all over the world.*
- 2. Easier accessibility.*
- 3. Fastest and Latest news updates as per the interest.*
- 4. Live coverage of Events, Cricket matches and other sports etc.*
- 5. A reader can easily give his/her comments on any issue.*
- 6. Breaking News can update Minute-to-minute.*
- 7. Pictures of specials news events.*
- 8. Mobile Responsive sites can access easily.*
- 9. Cost effective Advertisement Solution.*
- 10. Advertiser gets the details of people who read their ad, this facility cannot offer by Print or Electronic media.*

## REVIEW

*Writing for a news website is like writing news in other mediums, but the handling of the website is different. The writing still needs to be concise and direct, if not more than other news because there is more to pull the reader's attention to other articles, or even other sites than a print or television medium. The site would probably still be organized with the big story on the top or the biggest section, much like the newspaper. A completely news site would also be organized into sections such as news, sports, and entertainment.*

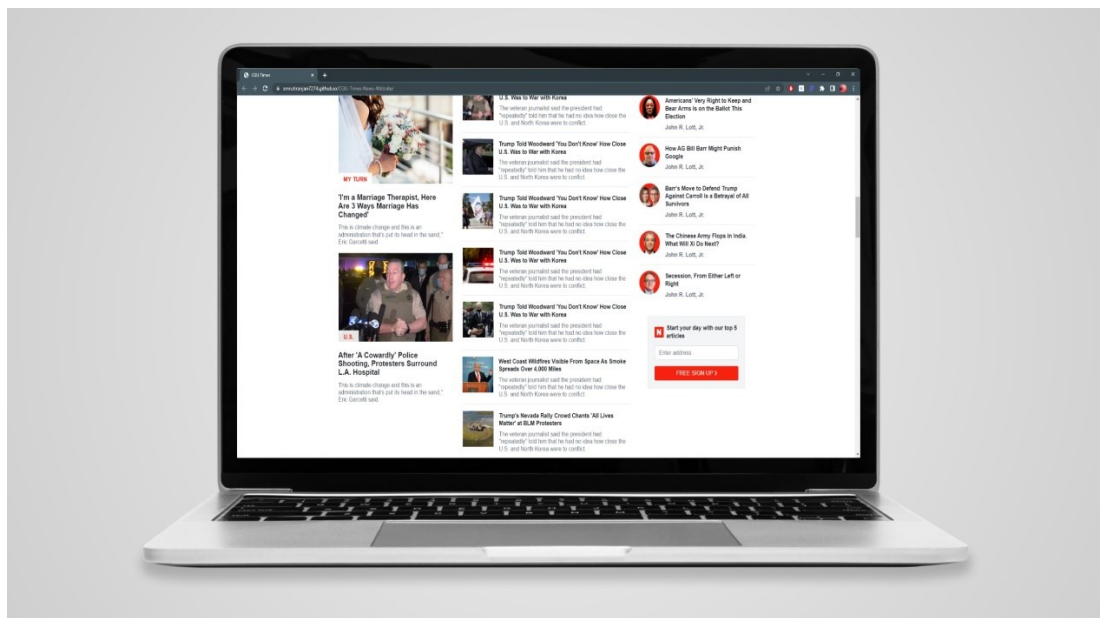

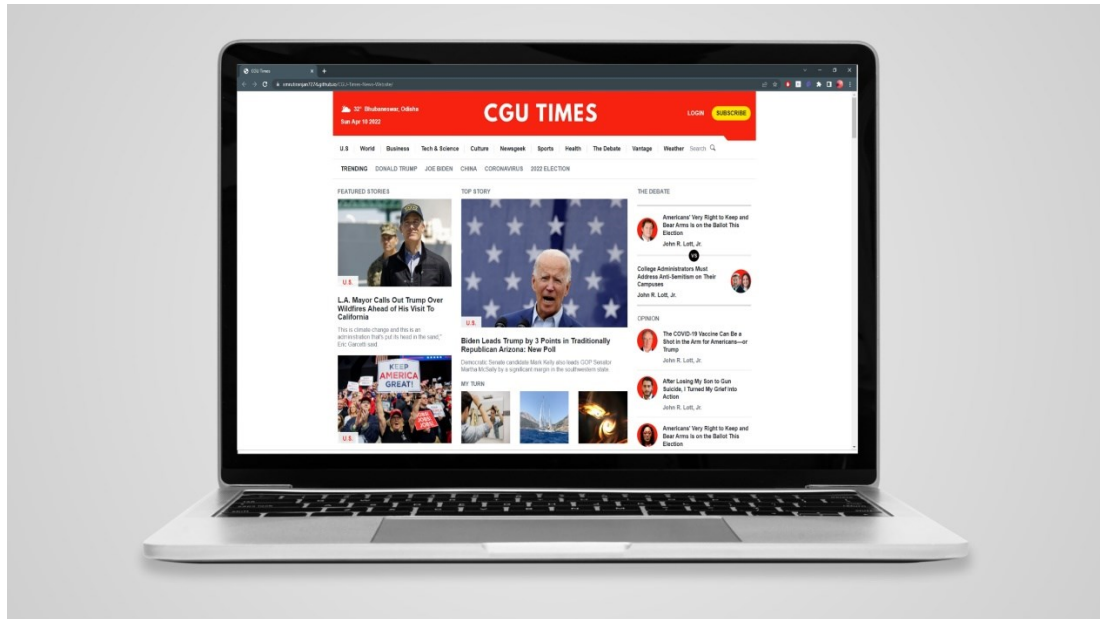

*News sites differ from other mediums because they have a greater responsibility to provide the latest news first because they don't have to wait until the broadcast like television or wait until the next printing like newspaper.*

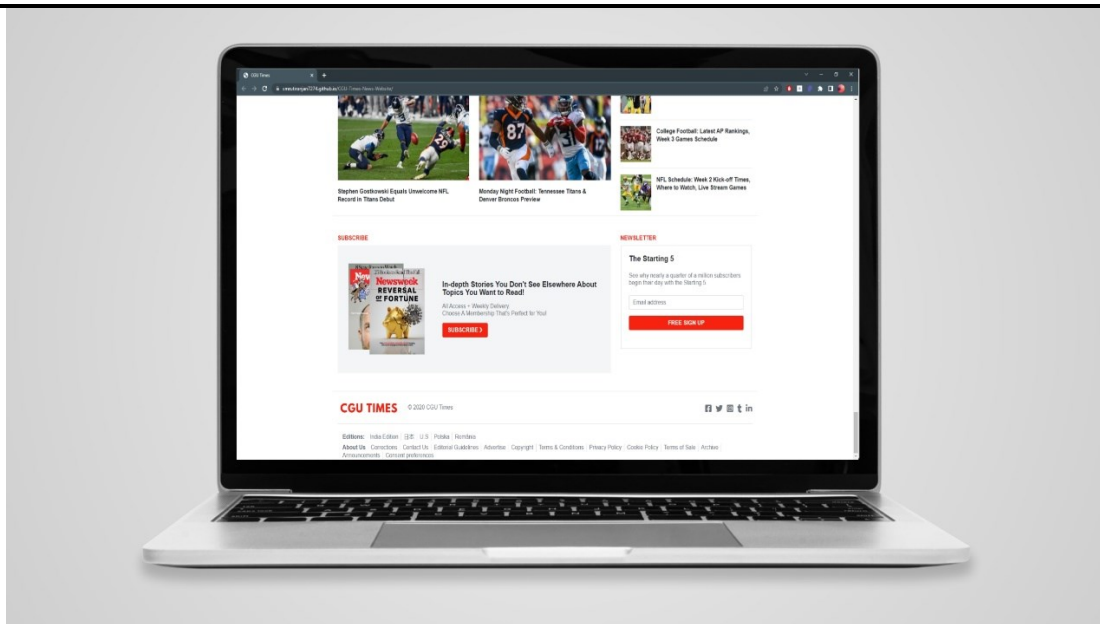

*Because of this, journalists need to be sure they are still providing accurate news.*
